

# HDTV Solutions for the Commercial & Hospitality Market

# Samsung Hospitality TV - Give Your Guests The Best

OFFICIAL HDTV OF THE NFL

## distinct

In our information and communication age, Hospitality TVs, once considered a novelty, are now a priority that can set a property apart from the rest. Samsung Hospitality TV Solutions address this need with TVs that reflect the distinctness of every room.

## competitive

The superb quality of Samsung Hospitality TV Solutions -- unique design, an integrated control system, home theater picture and sound, not to mention brand value -- will make a lasting impression on guests, bringing them back for more and increasing a hotel's or business' competitiveness in the process.

## edge

Consumers are more technology savvy than ever before. They have come to expect businesses they are visiting will offer the cutting-edge, high-tech, high-quality resources that they are accustomed to; with TVs as a main focus. Samsung Hospitality TV Solutions set the highest technology standard -- hotel guests and business patrons will definitely see the difference.

## Sensing, Speed & Synergy

Enjoy the clarity of HD in a stunningly modern design that enhances the decor in a guest room or suite even when it is off. High resolution and dynamic contrast ratios offer stunning image detail and vivid colors. Samsung's new line of HDTVs boast true 720p resolution in the smaller screen size models and full 1080p HD resolution in the models over 40 inches.<sup>1</sup> Designed to interface with hospitality PPV SBB from top in-room entertainment providers while also functioning with industry standard MPEG4 decryption hardware. Wide viewing angles add versatility and simulated surround sound emanates from hidden bottom speakers, filling the area with clear, rich sound. All models feature Samsung's exclusive Touch of Color™ design accents the bezel with a unique red tone (blue in the 6400 Series) and compliments any room.

The brilliant Samsung LED TV experience can be found in the C4000 and C6400 Performance series lines. Their incredible mega contrast provides blacker blacks and whiter whites along with enriched color expression. Their ultra-slim 1.2" depth is Samsung's slimmest HDTV yet, and that includes the tuner! InfoLink™ puts up to date information right at your fingertips. Best yet, Samsung LED TVs use 40% less power than conventional LCDs.
